

All you have to do is install xm radio in your car, stereo system or boom box (I have all three) to know that this is the BEST way to hear music, sports, news and traffic reports. It is wonderful. Static free and digital. I pay for two accounts, one for my car and one for my home because this is the system that brings listening enjoyment to me. Please, do not limit access to information found on XM's channels. If you can extend Internet shopping to a tax free status, surely you can support innovative listening technology to Americans. We can only wait until all information is sent to us via clear, accessible and constant XM satellite radio.
Please.. try it and see for yourself
